

# Tree

74,8 x 73,6 mm

## PRO

1

When scene starts

Place at  
x: -35 y: -150

Stitch

Set variable  
Length  
to 7

Point in direction 180 degrees

Broadcast and wait  
Line

Point in direction 90 degrees

Broadcast and wait  
Line

Point in direction 0 degrees

Broadcast and wait  
Line

Point in direction 90 degrees

Set variable  
Length  
to 15

Broadcast and wait  
Line

Point in direction 315 degrees

Broadcast and wait  
Line

Point in direction 90 degrees

Set variable  
Length  
to 6

Broadcast and wait  
Line

Point in direction 315 degrees

Set variable  
Length  
to 15

Broadcast and wait  
Line

Point in direction 90 degrees

Set variable  
Length  
to 6

Broadcast and wait  
Line

Point in direction 315 degrees

Set variable  
Length  
to 13

Broadcast and wait  
Line

Point in direction 225 degrees

Broadcast and wait  
Line

Point in direction 90 degrees

Set variable  
Length  
to 6

Broadcast and wait  
Line

Point in direction 225 degrees

Set variable  
Length  
to 15

Broadcast and wait  
Line

Point in direction 90 degrees

Set variable  
Length  
to 15

Broadcast and wait  
Line

Point in direction 90 degrees

Broadcast and wait  
Line

Point in direction 180 degrees

This part belongs to (1).

Tap "new" to create a new variable.

You'll find the variable in data.

2

When you receive  
Line

Repeat "Length" times

Move 10 steps

Stitch

End of loop

3

Check the bricks, if it still doesn't work.
